## VOCABULARY

- 2 Choose the correct answers.

My brother has always wanted to be an astronaut astronomer and visit the Moon. When he was three, our parents used to read him a book about a little boy in a huge <sup>1</sup> *balloon* / *parachute* filled with helium which floated up into the sky. The boy had amazing adventures in it as it reached the <sup>2</sup> *solar* / *space* system. He used to dream about visiting all the <sup>3</sup> *planets* / *planetariums*, especially Venus. He also used to make models of the <sup>4</sup> *atmosphere* / *spacecraft* he would travel in to get there. He still gets excited when he hears a plane break the <sup>5</sup> *sound* / *satellite* barrier.

**Space tourism**

Guy Laliberté, the Canadian founder of Cirque du Soleil, went into space in 2009. He did it because he wanted to make people aware of the drinking water problems facing all humans on planet Earth. He was able to spend a few days with scientists on the International Space Station and he did a webcast from the station with himself and other artists who were working in different cities around the world.

He had to travel to the station on a Russian spacecraft and he paid around \$40 million for this flight. Although he is a very fit man, he found some of the training very difficult. For example, he had to sit on chair and go round and round for ten minutes and it made him feel really sick. But when he finally got into space, he understood that he would have found it even more difficult if he hadn't had training at all.

The take-off was absolutely fantastic and it only took 8.5 minutes to get from Earth to space. The hardest thing for him was dealing with zero gravity, but that's why the training had been so important. He also took medicine which the astronauts take to deal with that problem.
